

GROWTH THROUGH INNOVATION

RETROFIT YOUR DRAFTING GATE

SAY GOODBYE TO EXPENSIVE UPGRADES

Is your drafting provider telling you your drafting equipment is in need of an expensive upgrade?

Avoid the expense and retrofit instead.

Enjoy all the same in shed functionality of your current drafting system plus:

- Draft cows with both HDX and FDX ear tags.
- Draft and identify cows with missing or defective EID tags.
- Access to the Herd-Man app for your Apple or Android device and you can setup drafts from anywhere without having to drive back to the range of the Shed WiFi.
- Use the Herd-Man app as a remote control for the gate if you are within range of the Shed WiFi.

Most gates are retrofittable. Ask for a farm visit from one of our Area Sales Managers to discuss your options.

BENEFITS INCLUDE:

- ✓ **Minimum disruption to cow flow:**
We've received feedback that the new gate action is very kind on the cows. Your cows will love you for it.
- ✓ **The layout of your yard will not change.**
We will be using your existing drafting gate frame. If you have cow flow issues with your current set up, then this is the perfect time to review the gate location.
- ✓ **Integrates into Herd-Man.**
Herd Online Management tool to easily set draft lists and for instant online access to a range of cow data, reports and management tools.
- ✓ **The cost to retrofit a drafting gate is generally around \$14,500 +gst.**
This includes all the hardware, parts and labour to convert your existing gate into a Herd-Man Drafter, but excludes mileage and any additional electrical work if required.
